

SAGE MASTER BUILDER VERSION 13 RELEASE HIGHLIGHTS

- **Point-and-click drill-down reporting**

Save hours of time! Just like with the Sage Master Builder Executive Dashboard (released in version 12), you can drill down multiple levels to record and transaction detail with the new, powerful report drill-down capability. More than 1,000 pre-built reports, as well as your own customized reports, become dynamic information portals, allowing you to navigate to the numbers and background detail behind the scene. With the proper security permissions, you can also update the information in real time for accurate, up-to-the-minute analysis.

- **Microsoft Windows Vista Business operating system compatibility**

Sage Master Builder Version 13, in keeping with Sage Software's Customer for Life philosophy, is compatible with Microsoft's Windows Vista Business operating system. Plan your PC upgrades with the assurance that your industry-leading construction solution will grow with your business and technical requirements.

- **E-mail enhancements**

Improve your communication and responsiveness to your clients and business partners with enhanced e-mail features such as authentication, tracking, prioritization, and read receipt.

- **Save and reprint check reconciliation reports capability**

Gain the benefit of creating a .pdf as you complete your check reconciliation process. Now you can easily generate a .pdf report for future reference and reprinting.

- **Ability to associate a Request for Information (RFIs) and Submittals with clients**

Improve your document management with the ability to associate RFIs and Submittals with a specific client or vendor.
